It is noted that applicants have elected methods that require SEQ ID NO: 739 without traverse (response filed June 23, 2008).

The instant application is a Continuation Application of Serial No. 10/131,827. Serial No. 10/131,827 is a Continuation-In-Part Application of Serial No. 10/006,290 which in turn relies on Serial No. 60/296,764. Neither Serial No. 10/006,290 nor Serial No. 60/296,764 is claimed for priority in the instant application. Applicants should claim priority and file a new oath or declaration.

The drawings are objected to for the following reasons.

- (a) The sheet on which Figures 5C and 5D appear is not labelled as a part of Figure 5.
- (b) The sheet on which Figures 5E and 5F appear is not labelled as a part of Figure 5.

The sheet on which Figure 7B appears is not labelled as a part of Figure Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1634

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 30-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are vague and indefinite.

- (a) The recitation of "comprises a nucleotide sequence of SEQ ID NO: 739" (claim 1) is vague and indefinite because the use of the indefinite article does not make clear whether the claimed methods require the entire 50-mer nucleotide sequence of SEQ ID NO: 739 or only a sub-sequence of SEQ ID NO: 739, which sub-sequence could be as short as two contiguous nucleotides.
